Series 8800 Evaluation Questionnaire

In order identify the cause of failure; it is important to provide complete details on the use of the instrument. Please complete the following questionnaire and fax it to TAI. An RMA number will be issued back to you for the return of the instrument.

Model number:	
Serial number:	
What type of process are you monitoring? (i.e. Cryogenic Air Separation, Natural Gas Production / Distribution, etc)	
Why do you think you are having a problem with the analyzer?	
What ambient temperature is the analyzer being exposed to?	
How far is the analyzer from the process?	
What type of tubing is used to bring the sample to the analyzer?	
If you are not using stainless steel tubing, please replace immediately with this material. Many analysis problems are tied to the use of improper tubing.	
Are there any other components in the flow path between the analyzer and the tubing such as pressure regulators, etc?	
If so, please list what they are, the manufacturer, and model numbers.	
What is the flow rate?	
What is the vent pressure of the analyzer?	

Thank you,
Customer Service
